

CONTENTS

Badriev I.B., Makarov M.V., Paimushin V.N.

Numerical investigation of a physically nonlinear problem of the longitudinal bending of the sandwich plate with a transversal-soft core4

Dimaki A.V., Shilko E.V., Astafurov S.V., Psakhie S.G.

The influence of fluid filtration on the strength of porous fluid-saturated brittle materials11

Grigoriev A.S., Shilko E.V., Skripnyak V.A., Chernyavsky A.G., Psakhie S.G.

The numerical model of dynamic mechanical behavior of brittle materials based on the concept of the kinetic theory of strength25

Kukudzhanov K.V.

Modeling the treatment of high-energy pulsed electromagnetic field of the micro-cracks in a polycrystalline metal38

Kukudzhanov K.V., Levitin A.L.

Transformation and interaction of microcracks in metal under high-energy pulsed electromagnetic field.....49

Ageev R.V., Kuznetsova E.L., Kulikov N.I., Mogilevich L.I., Popov V.S.

Mathematical model of movement of a pulsing layer of viscous liquid in the channel with an elastic wall resting on winkler foundation.....61

Lurie S.A., Solyaev Y.O.

Identification method of gradient models parameters of inhomogeneous structures based on discrete atomistic simulations68

Pustovoy N.V., Levin V.E., Krasnorutskiy D.A.

The numerical algorithm for solving the nonlinear boundary problem of the thin rod under dynamic deformations.....77

Radchenko V.P., Saushkin M.N., Bochkova T.I.

Mathematical modeling and experimental study of forming and relaxation of residual stresses in plane samples made of EP742 alloy after ultrasonic hardening under high-temperature creep conditions88

Shubin S.N., Freidin A.B.

A new algorithm for generating a random packing of ellipsoidal inclusions to construct composite microstructure99

Smirnov S.V., Vichuzhanin D.I., Nesterenko A.V.

A set of tests for studying the effect of the stress state on ultimate metal plasticity at high temperature110

Stepanova L.V., Roslyakov P.S.

Complete asymptotic expansion M. Williams near the crack tips of collinear cracks of equal lengths in an infinite plane medium121

Trusov P.V., Chechulina E.A.

Serrated yielding: physical mechanisms, experimental data, macrophenomenological models.....146

Yakovleva T.V., Bazhenov V.G., Krysko V.A., Krylova E.Yu.

Contact Interaction of plates and beams under the influence of white noise161
