

CONTENTS

All-Russian Association of Specialists in Kinesitherapy and Sport Medicine	1-4
M.A. Osipenko, M.Y. Nyashin, Y.I. Nyashin (Russia). Center of resistance and center of rotation of a tooth: the definitions, conditions of existence, properties.....	5-15
Y.I. Nyashin, M.A. Osipenko, V.Y. Kirykhin (Russia). On Influence of model on predicting modulus value of trabecular bone tissue	16-25
X. Wang, P. Waché, M. Navidbakhsh, M. Lucius, J.F. Stoltz (France). Three-dimensional numerical simulation of blood flow through a MODELED aneurysm.....	26-36
N. Antonova, I. Velcheva (Bulgaria). Characteristic parameters derived from whole blood viscometry in cerebrovascular disease	37-46
Yu.L. Venyovtseva, A.Ch. Melnikov, V.V. Revyakina, T.A. Gomova, N.A. Pukhanova (Russia). Left and right heart chambers interaction in healthy youth	47-52
Yu.V. Akulich, A.S. Denisov, R.M. Podgayets, A.Yu. Akulich (Russia). Computer simulation of the elastic modulus of hip head bone tissue during the hip joint loading variations	53-61
P.M. Calderale, C. Bignardi (Italy). The shoulder joint system: biomechanics and instability	62-74
W. Li, V. Haese-Coat and J. Ronsin (France). Object Detection in Medical Images Based on Improved Morphological Multiresolution Decomposition and Morphological Segmentation	75-88
M.Y. Nyashin, A.P. Osipov, M.Ph. Bolotova, Y.I. Nyashin, E.Y. Simanovskaya (Russia). Periodontal ligament may be viewed as a porous material filled by free fluid: experimental proof.....	89-95
M.Y. Nyashin, I.V. Bagautdinova, E.Y. Simanovskaya, S.A. Chernopazov (Russia). Biomechanical investigation of a trauma of the upper central incisor.....	96-100
A. G. Masich, Y. I. Nyashin (Russia). Mathematical modelling of orthopedic reconstruction of children's congenital maxillary anomaly	101-109
O.Y. Smetannikov, L.M. Gvozdeva, L.V. Maiorova (Russia). Strength estimation of a fixed bridge prosthesis	110-118
L.I. Mazheiko (Russia). Biomechanical approach to cranio-vertebral pathology in children	119-122
V.P. Lapshin, N.A. Korotaev, E.V. Seraya, V.Ph. Buryakov (Russia). Some biomechanical aspects of massage	123-125
