

CONTENTS

<i>L.V. Stepanova, E.M. Yakovleva</i> Mixed-mode loading of the cracked plate under plane stress conditions.....	4
<i>S.V. Glushkov, Yu.V. Skvortsov, S.N. Perov</i> Comparison of the results of solving the problem of fracture mechanics for pipe with non-through crack.....	18
<i>V.G. Zubchaninov, A.A. Alekseev, V.I. Gulyaev</i> About drawing the yield surface for steel 45 and verifying the postulate of isotropy on straight-line paths under repeated sign-variable loadings.....	23
<i>K.V. Kukudzhanov, A.L. Levitin</i> Deformation processes of elastoplastic material with defects under electrodynamic loading.....	29
<i>V.V. Karpov, A.A. Semenov</i> Dimensionless models of deformation of stiffened shell structures.....	37
<i>V.G. Bazhenov, M.N. Zhestkov, V.A. Zamyatin, A.I. Kibets</i> Finite element analysis for the leak detection in vessels of sodium-cooled fast reactors in case of beyond design basis accidents.....	50
<i>D.S. Lobanov, V.E. Wildemann, E.M. Spaskova, A.I. Chikhachev</i> Experimental investigation of defects influence on composites sandwich panels strength using digital image correlation and infrared thermography methods.....	56
<i>A.V. Ignatova, O.A. Kudryavtsev, S.B. Sapozhnikov</i> Experimental investigation and numerical modeling of elastic properties and strength of porous ceramics.....	63
<i>E.V. Zenkov, L.B. Tsvik</i> The formation of differently directed test forces and experimental evaluation of material strength under biaxial stretching.....	71
<i>A.Yu. Iziyomova, A.N. Vshivkov, A.E. Prokhorov, O.A. Plekhov, B. Venkatraman</i> Study of heat source evolution during elastic-plastic deformation of titanium alloy OT4-0 based on contact and non-contact measurements.....	77
<i>V.P. Selyayev, T.A. Nizina, A.S. Balykov, D.R. Nizin, A.V. Balbalin</i> Fractal analysis of deformation curves of disperse reinforced fine-grained concrete under compression.....	84
<i>V.V. Glagolev, A.A. Markin, A.A. Fursaev</i> Modelling the generation of new material surfaces in a composite with an adhesion layer under cohesive destruction.....	94
<i>N.E. Skryabina, V.N. Aptukov, P.V. Romanov, D. Fruchart</i> Grid method for studying deformed mg-alloys by equal-channel angular pressing.....	102
<i>N.S. Kondratev, P.V. Trusov</i> Nucleation of recrystallized grains in metals during thermomechanical processing.....	108
<i>V.S. Bondar, V.V. Danshin, D.A. Makarov</i> Mathematical modelling of deformation and damage accumulation under cyclic loading.....	120
