

CONTENT

O.A. Zagorskikh, A.B. Laptev

Formation of a hardened layer on the surface of austenitic stainless steel 5

D.B. Podashev

Study of the possibility of processing edges on gear wheels
with rotating elastic abrasive tools 19

G.N. Papulova

The structural transformations during dyes with ceramics
and earthenware glazes and decorative properties of the material 27

E.N. Pyzhenkov, I.T. Kuznetsov

A method for producing threaded holes in prefabricated cutting tool
 housings using additive technologies 33

G.I. Shaidurova, V.R. Khanova, V.V. Kuksinov

The development of a methodology for determining the binder content
in carbon fiber plastics using low-temperature solvolysis 40

*D.S. Belinin, Y.D. Shchitsyn, S.D. Neulybin, P.S. Voynov,
M.V. Pichkalev, R.G. Nikulin, S.G. Nikulina, K.P. Karunakaran*

Prospects for the application of high-performance plasma metallization
for the additive formation of aluminum alloy products 49

T.V. Olshanskaya, E.M. Fedoseeva

Analysis of crystallization processes occurring during welding
of austenitic steels (Review). Part 1 57

*S.V. Varushkin, V.Ya. Belenkiy, M.A. Kovtunovich,
N.A. Kolchanov, A.O. Pechenkin*

Electron beam additive technologies (review of literature sources) 79
