

CONTENTS

<i>Aristov S.N., Knyazev D.V.</i>	
Self-similar localized convective structures	5
<i>Badriev I.B., Banderov V.V., Zadvornov O.A.</i>	
On the solving of equilibrium problem for the soft network shell with a load concentrated at the point.....	16
<i>Badriev I.B., Nechaeva L.A.</i>	
Mathematical simulation of steady filtration with multivalued law.....	35
<i>Belyayev Yu.N.</i>	
Methods for computing a transfer matrices of elastic deformations	63
<i>Burago N.G., Nikitin I.S.</i>	
The durability increase of the titanium compressor disk with the help of alloy structure management in the near-surface layer	111
<i>Isupova I.L., Trusov P.V.</i>	
Mathematical modeling of phase transformations in steel under thermomechanical loading.....	126
<i>Isupova I.L., Trusov P.V.</i>	
Review of mathematical models on phase transformations in steels	157
<i>Nikulin I.L., Perminov A.V.</i>	
The mathematical model of nickel melt convection in the induction melting. The solving of the magnetic subproblem.....	193
<i>Savelieva N.V., Bayandin Yu.V., Naimark O.B.</i>	
Model for the spalling formation.....	210
<i>Sargsyan S.H., Farmanyany A.J.</i>	
Thermoelasticity of micropolar orthotropic thin shells.....	222
