

CONTENTS

<i>A.B. Ponomarev, E.N. Sychkina</i>	
About possibilities of development the master's program "Innovative technologies of low-rise construction" on the direction 08.04.01 "Construction"	5
<i>V.V. Lushnikov</i>	
Evaluation of two normative methods of calculation deformations of foundations	15
<i>A.P. Malyshkin, A.V. Esipov</i>	
Numerical study load distribution between piles in groups	31
<i>I.A. Drobinina, O.I. Ruchkinova</i>	
Survey scheme water supply and sanitation Kultaevskaya rural settlement. Future development of engineering network village	39
<i>N.M. Koshak, S.V. Novikov, O.I. Ruchkinova</i>	
Improvement scheme of wastewater treatment of petrochemical production	51
<i>I.A. Chernysheva, A.V. Mashchenko</i>	
Comparison of methods of protection of frost heaving soil	64
<i>E.P. Vikhareva, T.N. Beloglazova</i>	
Application for copper pipelines for in-house gas supply	73
<i>D.A. Semenov, S.V. Kaloshina</i>	
Innovative technology construction of artificial islands	80
<i>A.P. Malyshkin, A.V. Esipov</i>	
Numerical researches stress-strain state and displacements of pile foundations with remote central pile	93
<i>L.A. Igosheva, A.S. Grishina</i>	
Design of experiments to consolidate the water-saturated clay soil base by magnesium sulfate in the construction of buildings and structures	102
<i>S.A. Kudriavtsev, T.Iu. Val'tseva, E.D. Goncharova</i>	
The development of structures for strengthening of sliding slopes from highway "Amur" with using of modern geosynthetic materials	111
<i>P.A. Liashenko, D.V. Gokhaev, O.A. Shmidt</i>	
Estimation of changes in the deformation characteristics of clay soils in the bottom of bored piles under repeated loading	123
<i>A.I. Polishchuk, A.S. Mezhakov</i>	
Geotechnical barrier and its impact on foundation settlement of adjacent buildings	133
<i>M.V. Rubtsova, V.I. Kleveko</i>	
Analysis of the possibility of using triaxial test system for the study of strength and deformation characteristics of reinforced soil	143
