

CONTENTS

<i>A. Golovin</i>	
Criticism of project approach to determination of urban agglomerations	6
<i>T. Gagnidze, T. Gudz</i>	
Development of the city of Perm by way of interaction between the city and the campuses.....	19
<i>C. Парринелло, Ф. Пиккио, Р. Де Марко</i>	
Трехмерная Павия: чтение и декомпозиция города для построения динамических баз данных по архитектурному наследию.....	33
<i>S. Maksimova, O. Popovtseva</i>	
Application of Prototyping method in urban planning on the example of the development project of Długa Street (Gdansk, Poland)	46
<i>A. Alekseev, A. Klejmenova, V. Spirina</i>	
Selection of a place for the opening of a store within walking distance (by the example of Oktyabrsky microdistrict of the city of Perm)	58
<i>A. Kuznetsova, Y. Bushmakova</i>	
Survey of riversides landscapes in the city of Ussolye	69
<i>S. Zhukovsky, A. Surkov, A. Kychkin</i>	
Topical aspects of sustainable development of high-tech urban environment.....	80
<i>E. Kolesova, T. Bochkareva</i>	
Research in principle of operating of ventilated facades.....	93
<i>I. Shchukin, O. Ruchkinova</i>	
Multicomponent filtration media for stormwater bioretention filters	105
<i>S. Leontieva, G. Yagafarova, N. Fatihova, I. Gabitova, N. Zinovieva,</i> <i>Yu. Fedorova, G. Kuznetsova, D. Yagafarova</i>	
Monitoring of minor rivers contamination by ecotoxicants by the example of Shugurovka River	116
<i>Yu. Kurbatov</i>	
Problems and possible directions of solving the task of structural-simulation modeling of fiber-reinforced concrete composite.....	126
<i>K. Saraykina, V. Golubev, G. Yakovlev</i>	
Investigation of nanostructured modifiers influence on the processes of basalt fibrous concrete structure formation	140
<i>A. Martirosyan, V. Travush, G. Kashevarova</i>	
Study of influence of the rigid reinforcement geometry on the load distribution in steel-concrete composite construction elements.....	147
<i>M. Vodiannikov, A. Vorobiov</i>	
Analysis of Wood Structure Connections Using Cylindrical Steel and Carbon Fiber Dowel Pins.....	159
<i>I. Zueva</i>	
Research stress-strain state structural design with the compound bolted normal accuracy	170
