

CONTENTS

<i>V.N. Aptukov, P.V. Romanov, N.E. Skryabina, D. Fruchart</i>	
Processing fine magnesium materials. Numerical simulation and experimental analyses	5
<i>P.A. Bakusov, A.A. Semenov</i>	
Stability of toroidal shell segments at variation of a deflection angle	17
<i>N.V. Banichuk, E.V. Makeev</i>	
Variational method for non-classical problems of mechanics with constraints based on finite elements approximations and local variations	37
<i>V.S. Bondar, D.R. Abashev, V.K. Petrov</i>	
Plasticity of materials under proportional and nonproportional cyclic loading	53
<i>A.S. Grigoriev, E.V. Shilko, V.A. Skripnyak, A.G. Chernyavsky, S.G. Psakhie</i>	
The numerical model of dynamic mechanical behavior of brittle materials based on the concept of the kinetic theory of strength	75
<i>M.A. Ilgamov, A.A. Yulmukhametov</i>	
Direct and inverse problems of pipeline bending.....	100
<i>A.E. Mashikhin, A.A. Movchan</i>	
Thermomechanical boundary problems for a cylinder and sphere made of shape memory alloy.....	113
<i>Yu.V. Nemirovsky, A.I. Boltaev</i>	
Calculation and design of hybrid wooden beams	129
<i>A.A. Pan'kov, P.V. Pisarev</i>	
ANSYS numerical modeling of electroelastic fields in the piezoelectro luminescent fiber-optical sensor diagnosing the composite volume deformed state.....	153
<i>T.P. Romanova</i>	
Modeling of dynamic bending of a rigid-plastic reinforced layered curvilinear plate with a supported circular hole under explosive loads	167
<i>A.A. Tyrymov</i>	
State equations of the draph model of three-dimensional elastic solids in cartesian coordinates	188
<i>V.G. Zubchaninov, A.A. Alekseev, V.I. Gultiaev</i>	
Modeling of elastic-plastic deformation of work material along multielement piecewise zig-zag linear trajectories	203
<i>A.V. Zabelin, A.A. Pyhalov</i>	
Finite-element model validation and its execution algorithm	216
Terms of publishing articles in the "PNRPU Mechanics Bulletin"	234
