

CONTENTS

<i>S. Maksimova, I. Aristova, N. Dubrovskaya</i> Organization of a recreation zone in the river Mulianka valley on the basis of urban planning analysis of the territory	5
<i>N. Goroshko, E. Emelyanova, S. Patsala</i> Capabilities of urban space for environmental education in the sphere of recreation and leisure by the example of the city of Novosibirsk	17
<i>N. Kosheleva, D. Vlasov, I. Korlyakov, N. Kasimov</i> Effect of build development on contamination of urban soils with heavy metals	36
<i>S. Serikov, M. Shatz</i> Frost cracking of soils and its role in the state of the surface and infrastructure of the city of Yakutsk	56
<i>L. Zadorina, V. Muratova, V. Golubev, O. Zverev</i> Theoretical and experimental analysis of methods and devices for snow removal from pitched roofs	70
<i>T. Krashenninnikova, A. Grishkova</i> A study of the atrium height influence on the building microclimate using mathematical modeling	86
<i>K. Golubev</i> Justification of the results of court construction-technical expertise under the conditions of uncertainty	100
<i>A. Orlov, S. Leont'ev, A. Kurzanov</i> Experimental evaluation of the effectiveness of non-autoclaved aerated concrete manufacturing process optimization method	114
<i>M. Son</i> Flange connections in building constructions	125
<i>S. Cheremnih, D. Tatiannikov, V. Kleveko</i> Monitoring of temporary road deformations	137
<i>O. Makovetskiy</i> Evaluation of the effect of flooding of urban areas on the change of physical-mechanical properties of soils	148
<i>A. Zakharov</i> Temperature monitoring of surface layers of the earth in the city of Perm	160
<i>E. Anferov, A. Grishina, R. Smirnov</i> Research of possible application of fibrous waste as reinforcing fibres for the creation of efficient geotechnical constructions	168
