## Differential Equations, Dynamical Systems and Optimal Control

*K.B. Mansimov, V.A. Suleymanova*

Analog of the method of dividing the Lagrange multiplier to summands  
in a boundary problem of optimal control for Goursat – Darboux systems.....7

## System Analysis, Control and Data Processing

*S.S. Gusev*

Information systems software development process control .....23

*F.M. Cherepanov*

Methods of improving neural network systems efficiency  
in conditions of limited data sets with complex correlations .....40

*A.I. Meyer*

Methods, frameworks and virtual platforms in domain of portable self-driving  
vehicles control adjusted for undetermined dynamic environment conditions:  
literature review .....62

*M.V. Danilov*

Short-term forecasting of time series based on evolutionary algorithms .....84

## Organizational Behavior Control in Social and Economic Systems

*A.O. Alekseev*

Rating and control of complex objects in uncertainty cases.....103

## Mathematical Methods and Tools in Economics

*A.V. Zatonskiy, L.G. Tugashova, A.E. Barova*

Modeling and forecasting of domestic and international tourism  
in Turkey .....135
