

CONTENTS

Zanevskii E.S., Freyman V.I., Yuzhakov A.A.

Anniversary of the «Automation and telemechanics» department:
history, people, progress, perspectives7

Gelver F.A., Belousov I.V., Samoseiko V.F.

Methods for improving the quality of synthesizable voltage
of the cascade frequency convertesr21

Filina O.A., Tsvetkov A.N., Khusnutdinov A.N., Logacheva A.G.

Improvement of reliability of the improved brush-collector
assembly of the dc motor of the mobile composition46

Tyurin S.F.

«Billiard» computer's logic61

Kotov A.A., Neystroev N.I., Chyidyk I.A.

Development of the mathematical model of the asynchronized synchronous
wind generator for the problem of optimization of the basic geometric
dimensions based on generalized variables78

Zatonskiy A.V., Tugashova L.G.

Identification of parameters in a dynamic model
of a heat exchanger99

Popov S.A., Krivchenkov V.I.

Identification of the time constant of dc motor rotor115

Mylnikov L.A., Morozov A.S., Pukhareva D.V.

Selecting a classification methods and increasing its efficiency
in identification tasks on the example of identifying frauds
in walk out retail stores129

Naumov M.D., Shcherbinin A.G.

Mathematical modeling of the nonstationary thermal conductivity
of cable lines laid in the ground147

Klyuchnikov A.T., Turpak A.M.

Sensorless vector control asynchronous motor when calculating
in a complex form.....160

*Rudi D.Yu., Gorelov S.V., Vishnyagov M.G., Zubanov D.A., Zubanova N.V.,
Ivanov D.M., Ruppel A.A.*

The algorithm for determining the conductive low-frequency
electromagnetic interference by the coefficient of the nth harmonic
component of the voltage.....177

Popov I.P.

Storage electrostatic energy195
