

CONTENTS

<i>Ruban N.Yu., Askarov A.B., Andreev M.V., Kievets A.V., Rudnik V.E.</i>	
Analysis of impact of renewable energy sources with power converters on the processes in modern electric power systems	7
<i>Korelov S.V., Petrov A.M., Rotkov L.Yu., Gorbunov A.A.</i>	
Determining the sample length of the electronic letters model.....	31
<i>Pinyagin D.S., Kostarev N.A., Trufanova N.M.</i>	
Numerical study of thermal processes in a well with a bottom heater	48
<i>Konyaev A.Yu., Bagin D.N., Lapteva E.O.</i>	
Modeling the motion of conducting particles in the active zone of a linear inductor of eddy-current separatos	63
<i>Marakhtanov A.G., Parenchenkov E.O., Smirnov N.V.</i>	
Fraud detection by machine learning methods in the case of an imbalanced dataset.....	80
<i>Muravyova E.A., Atangulova E.H.</i>	
Development of an adaptive fuzzy control system for rectification of the return solvent	96
<i>Akhmetzyanov K.R., Tur A.I., Kokoulin A.N., Yuzhakov A.A.</i>	
Optimization of neural network computation.....	117
<i>Kurashkin S.O., Tynchenko V.S., Murygin A.V., Rogova D.V.</i>	
Thermal field modeling of the electron beam welding process with dynamically variable parameters of product's alloys	131
<i>Goltsov E.S., Djatlov I.Ya., Trufanova N.M.</i>	
Modeling the heat transfer process during silane crosslinking in a two-component water–gas medium using a volume of fluid model.....	146

Volkov S.D., Tsaregorodtsev A.V.

One of the approaches to computer attacks' recognition
when implementing the state's information function
on the internal level159

Tumaeva E.V., Kuzin S.S., Aflyatunov I.F., Makuseva T.G.

Solution of the problem of optimal power distribution of individual
compensating devices for a group of asynchronous motors
for a stable operating mode and for a grindly variable load.....175

Shaburov A.S., Shlykov A.I.

Development of method for assessing the economic efficiency
of the information secutity system for commercial enterprises193

Kiseleva T.V., Mikhailov V.G., Ivushkin A.A., Mikhailov G.S.

The use of directed graphs in the management processes
of eco-economic activities214
